## LABORATORY REPORT

### Coronavirus SARS-COV-2 RT-PCR

#### PATIENT

Patient Name: Ake Pettersson  
Medical Record Number: N/A  
Date of Birth: 07/09/1972  
Sex: M  
Phone: 952-210-1897

Email: giljo72@gmail.com  
Address: 11 Sherwood dr  
City: NASHUA  
State (or Province) / Zip: New Hampshire 03063  
Country: United States of America

#### PHOTO ID VERIFICATION

Passport: 96052900

#### SPECIMEN

Collection Date & Time: 08/03/2021 09:20  
Specimen Type: Nasopharyngeal  
Swap Type: Nasal Swab  
Provider Name: Dr. Cecilia Vicuna-Keady  
Provider NPI: 1558334656

## REPORT SUMMARY

#### TEST

Test Name: SARS-CoV-2 RT-PCR (Qualitative NAAT, Endpoint)

This test has been authorized for use by the FDA under an Emergency Use Authorization (EUA), for use by authorized laboratories or patient care settings.

Test Type: Cepheid Genexpert Xpress

Instrument: Cepheid Xpert Xpress SARS-CoV2 RT-PCR Test

#### RESULTS

**RESULT: NEGATIVE** for SARS-CoV-2 ("coronavirus")

Verified: 08/03/2021 10:14

Verified By: Madeline Clark

#### INTERPRETATION / NOTES

If your result says "Positive" this means the COVID-19 virus was found in the sample and it is very likely that you are infected with COVID-19. Contact your healthcare provider to interpret and determine how best to care for you based on the test results along with medical history, your symptoms and other factors. You must quarantine to avoid spreading the virus to others. Your healthcare provider will help you determine how long you must remain quarantined. If your result says "Negative" this means the virus that causes COVID-19 was not found in your sample. A test result that says "Negative" for a sample collected while a person has COVID-19 related symptoms usually means that COVID-19 did not cause your symptoms. There may be other causes of your symptoms that require treatment. It is also possible that this result is not correct (it could be a false negative). Follow up with your healthcare provider to interpret and consider the test result together with all other aspects of your personal and medical history, such as symptoms, possible exposures, geographical location of places you have recently traveled, and other factors, in deciding how to care for you. It is important that you work with your healthcare provider to help you understand the next steps you should take. It is important to be evaluated by your healthcare provider to address any symptoms and quarantine according to your healthcare provider's recommendation.

This test has been authorized for use by the FDA under an Emergency Use Authorization (EUA), for use by authorized laboratories or patient care settings.
